EDUCATION

Indira Gandhi National Open University	(June 01, 2019 - May 01, 2022)
Bachelors, Commerce	61.2/100

INTERESTS

Photography	3d Design
UI and UX design	Reading

I'm a motivated and enthusiastic individual with a strong interest in Web Development and Machine Learning. I have finished college with a Bachelor's degree in Commerce at Indira Gandhi National Open University. I have professional knowledge in MERN stack and in Machine Learning. I'm looking for a full-time position to utilize my knowledge and experience to build and maintain Web Applications and Machine Learning solutions.

PROJECTS

ComfySloth
Mock E-Commerce site

- Designed and coded a mock e-commerce website that has complete user authentication using Auth0, and a payment gateway using Stripe.
- Designed a cart functionality that limits the purchase of products based on inventory stock. Stock is also differentiated by color, i.e., each color of a given product has it's own stock.
- Implemented a fully featured filtering system that can be used to filter the products based on category, color, price and company. Also implemented a search functionality.
- Designed a rich UI that helps the user to navigate the website easily.
- Information is pulled from a backend that contains a database of the stock in inventory.

The Cocktail Database
A React Webapp database for cocktails

- Designed and coded a website that contains details about 90 different cocktails that have been certified by the IBA (International Beverages Association).
- Implemented a filtering system for filtering by the category of drink, and a search functionality to search for a specific drink.
- Designed and implemented a beautiful UI written with Bootstrap 5.
- It gets data from a backend which stores the data as a JSON object, which leads to easy updates to the drink catalogue.

React Building Blocks
A set of useful React components

- Created from scratch a few useful React components that are present in most websites.
- Examples include a Reviews component, a FAQ Accordion component, a Menu component, a Tabs component, a Slider component, a Form component, a Navbar component, a Sidebar component, a Cart component, etc.
- Also created niche components like a lorem ipsum generator, a Color Shades generator, a To Do list component, etc.
- All of the components are also modular and easy to extend to new features and functions as necessary.

NatureWalks
Mock Eco-Tourism website

- Designed and created a mock eco-tourism website that contains a bunch of tours that are being offered by the company.
- The tours are pulled from a backend which contains a database of the tours being offered which helps in easier management.
- Designed and implemented a header element that cycles through the core elements of the company's philosophy.
